

MatchOp

MATCH THE OPPORTUNITY

PRE-SEED INVESTOR MEMORANDUM

♦ POST-AUDIT VENTURE STRATEGY & EVIDENCE-DRIVEN FINANCIAL BLUEPRINT

The Opportunity Matching Infrastructure for North Africa

An empirical, investor-grade memorandum analyzing the school-to-work transition, proprietary closed-loop recruitment architecture, multi-vertical expansion, and the 50,000 TND commercial validation milestone round.

CORPORATE VEHICLE & STATUS

MatchOp SAS (Incorporation Pending in Mahdia, Tunisia)

TECHNICAL STACK

React 19 | Supabase Cloud | pgvector 384-dim | Python Scrapling + Groq AI

FOUNDING TEAM

Zied Fatnassi, Iheb Messabi, Hedi Ben Dhieb, Oussema N. Nabaoui, Wafei N. Nabaoui

CURRENT STAGE BASELINE

Pre-Launch Development (0 Students, 3 Active Design Partner Companies, 0 TND Rev)

CONFIDENTIAL — INJAZ TUNISIA & PRE-SEED INVESTOR COMMITTEE EDITION

September 2026 • Mahdia, Tunisia •
matchop.vercel.app

01. Document Classification & Methodology Standard

This memorandum serves as the definitive, institutional investment proposal for **MatchOp**. To ensure complete rigor and meet global venture standards, every statement and metric is internally classified under strict fact-versus-assumption discipline:

[VERIFIED CURRENT FACT]

Audited codebase, schema, and current pre-launch operational counts.

[MARKET DATA]

Official data from INS, Ministry of Higher Ed, Smart Capital, and HCP.

[STRATEGIC RECOMMENDATION]

Evidence-based strategic guidance on monetization, GTM, and focus.

02. Executive Summary

The Graduate Paradox: Tunisia produces over **54,381 university graduates annually** [MARKET DATA] (including 3,110 engineers and 6,885 masters), yet higher education unemployment sits at **26.6%** (surging to **35.6% for women**) and youth unemployment reaches **35.4%** (INS Q2 2026). Simultaneously, the tech innovation ecosystem—with **1,165 labeled startups** [MARKET DATA] and hundreds of IT service firms (ESNs)—faces severe talent bottlenecks caused by 25–35% annual senior engineer emigration.

The MatchOp Solution: MatchOp (matchop.vercel.app) replaces passive job boards with an **algorithmic shortlisting exchange**. By evaluating structured student competency vectors against job criteria using 384-dimensional semantic embeddings, MatchOp eliminates the "resume black hole" for candidates and delivers a pre-screened top 5–10 shortlist to employers within **48 to 72 hours**, reducing recruiter screening labor by >75%.

UNVARNISHED STRATEGIC REALITY

MatchOp is in the

PRE-LAUNCH DEVELOPMENT PHASE

with

0 REGISTERED STUDENTS AND 0 TND IN REVENUE

[VERIFIED CURRENT FACT]. However,

3 COMMERCIAL COMPANIES

(Solution Creative Events, Nomade Arts, Nexus) have created accounts and expressed collaboration interest.

Management is raising an agile

50,000 TND VALIDATION TRANCHE

to fund legal incorporation, campus club rollout, and prove employer willingness to pay across a 90-day pilot.

03. Investment Snapshot

PARAMETER	VALUE / TARGET	ANALYTICAL CONTEXT & CLASSIFICATION
Target Funding Ask	50,000 TND (~\$16,200 USD)	Pre-seed commercial validation check [MANAGEMENT INPUT]
Operating Runway	9 to 12 Months	Disciplined burn in Mahdia/Tunis [FORECAST]
Current Development Stage	Pre-Launch / Early Validation	Code complete; customer acquisition pending [VERIFIED CURRENT FACT]
Commercial Beachhead	Junior Tech & Engineering	ESNs & Startups in Grand Tunis, Sousse, Sfax [STRATEGIC REC]
Primary B2B Monetization	280 TND / Shortlist	Pay-per-shortlist & 690 TND/mo subscription [ASSUMPTION]
Core Technology Assets	React 19, Supabase, pgvector	Semantic matching, Python scraper, realtime chat [CURRENT CAPABILITY]
Key Validation Milestone	15-20 Paying Employers	Proof of B2B willingness-to-pay & 15+ hires [VALIDATION REQ]

04.

Company Overview & Leadership

Corporate Profile

Brand:

 MatchOp (« Match the Opportunity »)

Legal Entity:

 MatchOp SAS (Registration scheduled post-funding)

Headquarters:

 Mahdia, Republic of Tunisia

[MANAGEMENT INPUT]

Live Web Application:

[matchop.vercel.app](#)

Founding Team & Contributors

Zied Fatnassi:

 Lead Architecture & Software Engineer (Core committer)

Iheb Messabi:

 Full-Stack Platform Engineer (Core committer)

Hedi Ben Dhieb:

 Operational & Business Strategy Team

Oussema N. Nabaoui & Wafei N. Nabaoui:

 Operational Strategy Team

*Formal C-suite officer titles to be registered upon legal incorporation.

05.

Current Development Stage Audit

A rigorous audit of the MatchOp repository and database confirms that the software platform is fully developed and deployed, but currently operating in a pre-launch state:

Platform Component	Codebase Verification	Operational Status
Student Frontend UX	src/components/discovery/VerticalOpportunityFeed.jsx	100% Functional (Framer Motion gestures, scope filters)
Matching & Embeddings	supabase/functions/swipe-stack & pgvector	Implemented (384-dimensional cosine similarity)
External Job Scraper	scraper/matchop_scraper/ (Python 3.11)	Operational (Scrapling + Groq AI extraction into external_jobs)
Employer Portal	src/pages/company/PostOffer.jsx & CompanyIntros.jsx	Implemented (Job creation, intro review, chat access)
Active Users / Revenue	Production database records	0 Candidates, 3 Companies, 3 Offers, 0 TND Revenue [VERIFIED CURRENT FACT]

06. - 07.

The Problem & Structural Market Pain

Candidate Pain (Supply Side)

- **The Resume Black Hole:** Students spend 40+ hours/month submitting 50+ applications with a sub-10% response rate.
- **The Experience Paradox:** Entry-level roles demanding 2-3 years experience lock out capable graduates whose projects are ignored.
- **Information Asymmetry:** No transparent feedback on why applications fail or what technical skills are missing.

Employer Pain (Demand Side)

- **Resume Noise:** Sifting through 200–500 unqualified PDFs per job post consumes 15–25 hours of engineering management time.
- **High Senior Turnover:** 25–35% annual senior developer attrition to European firms demands continuous junior intake.
- **Prohibitive Legacy ATS Costs:** LinkedIn Recruiter (\$800+/seat/mo) is economically unfeasible for local currency tech SMEs.

08.

The MatchOp Solution: Algorithmic Exchange

09. - 10.

Technology & AI Architecture

MatchOp's technical architecture is built for extreme performance, security, and capital efficiency:

Frontend & Interaction Engine

Core Stack:

React 19 SPA bootstrapped with Vite 7.

Mobile Gestures:

framer-motion spring physics powering vertical discovery feeds.

Localization:

i18next full bilingual English/French engine.

Analytics:

Integrated Vercel Speed Insights & Web Vitals tracking.

Backend & AI Services (Supabase)

PostgreSQL 15 + pgvector:

384-dimensional dense vector embeddings for real-time similarity search.

Row Level Security (RLS):

Multi-tenant isolation enforced at database level across all tables.

Edge Functions (Deno):

swipe-stack, record-swipe, janitor, ai-profile-polisher.

Supabase Realtime:

WebSocket messaging channels for instant chat.

External Scraper Subsystem (Python 3.11 Worker)

Housed in scraper/, this standalone worker uses **Scrapling** to fetch job listings from global and regional ATS boards (Greenhouse, Lever, Workable). **Groq AI** extracts structured skills, experience level, and metadata, deduplicating via content_hash and upserting into external_jobs.

11. - 12.

Native Workflow vs. External Discovery

Workflow Dimension	Native Matchop Jobs (Offers)	External Aggregated Jobs (external_jobs)
Source of Opportunity	Directly posted by registered companies	Ingested via automated Python scraper
Application Action	In-app right swipe triggers intros handshake	External redirect to original URL (new tab)
Tracking & Data Loop	Closed-loop: View → Swipe → Intro → Match → Hire	Outbound click only; no outcome tracking
Transactional Revenue	100% Monetizable (Pay-per-shortlist, subs)	0 TND Revenue (Pure top-of-funnel liquidity)

13. - 14.

Candidate & Employer Product Specs

Candidate Features [CURRENT]

- Structured profile builder with normalized degree taxonomy.
- Secure CV upload to Supabase private storage bucket.
- Interactive match score breakdown (0–100% fit).
- Preferences drawer (location, job type, radius filter).
- Scope toggle (Local campus vs. Global remote opportunities).

Employer Features [CURRENT]

- Fast job posting portal with automated vectorization.
- Kanban intro triage ranked by algorithmic fit score.
- Verified candidate profiles with skill badge displays.
- Realtime in-app messaging thread upon intro acceptance.
- Hiring analytics dashboard tracking views, swipes, and intros.

15. - 16.

Business Model & B2B Pricing Strategy

STRATEGIC DIRECTIVE: REJECTION OF CANDIDATE APPLICATION PAYWALLS

MatchOp's codebase contains pricing for candidate subscriptions (19 TND/MONTH OR 149 TND/YEAR) to bypass swipe caps. With 35.4% youth unemployment and only ~3% mobile wallet penetration in Tunisia, charging candidates creates extreme drop-off and starves platform liquidity.

CORE CANDIDATE DISCOVERY MUST BE 100% FREE. 85% TO 90% OF REVENUE WILL BE CAPTURED FROM B2B EMPLOYERS.

COMMERCIAL TIER	PROPOSED PRICING	DELIVERABLES & SERVICE LEVEL AGREEMENT
Tier 1: Pay-Per-Shortlist	280 TND / role (~\$90 USD)	1 Active Role • Top 5–10 Pre-Screened Candidates • 48–72h SLA • 14d replacement guarantee.
Tier 2: Growth Pro Recruiter	690 TND / mo (~\$220 USD)	Up to 3 Active Roles • Guaranteed 48h Shortlists • Direct Realtime Chat • 1 Free Role Rollover/mo.
Tier 3: Enterprise Annual	1,800 TND / mo (~\$580 USD)	Unlimited Active Postings • Dedicated Account Lead • Direct ATS Webhooks • Campus Branding Days.

*B2B pricing figures represent proposed hypotheses requiring empirical validation during the 90-day pilot.

17. - 18.

Market Sizing: TAM / SAM / SOM

TAM: Pan-MENA HR Tech

\$350M - \$450M

Total commercial spending on digital recruitment, ATS tools, and junior hiring across North Africa and the GCC.

SAM: North Africa Junior Tech

\$18.5M - \$25.0M

Recruitment budgets for junior software engineers, PFE interns, and early-career business roles in Tunisia & Morocco.

SOM: 3-Year Tunisia Beachhead

324,000 TND

Targeting 180 paying tech employers (9.1% market share) in Grand Tunis, Sousse, and Sfax at 1,800 TND ARPE.

19. - 20.

Customer Segmentation & Beachhead Focus

MatchOp focuses strictly on **IT Consultancies (ESNs) and VC-Backed Startups** as Tier 1 customers:

- High Urgency & Attrition:** Tunisian ESNs lose senior engineers to European firms at rates of 25–35% annually, forcing constant junior intake.
- Foreign Currency Revenues:** Many Tunisian tech firms bill European or Gulf clients in Euros or USD, giving them superior liquidity and purchasing power.

- **Low Enterprise Friction:** Unlike multinational corporations tied to SAP SuccessFactors, tech founders and CTOs make software purchasing decisions in under 2 weeks.

21. - 22.

Competitive Landscape & Differentiation

PLATFORM	TARGET AUDIENCE	EMPLOYER COST	SCREENING MECHANISM	MATCHOP ADVANTAGE
LinkedIn	Mid-to-Senior Pros	\$800+/seat/mo	Keyword / Recruiter AI	Optimized for junior capstone projects & bilingual context
Keejob / Tanitjobs	Broad National Audience	300–2,000+ TND	Raw resume flood (2000s UX)	Delivers curated top 5–10 shortlist instead of 300 raw PDFs
Bayt.com	Pan-Arab Corporate	\$150–\$990/mo	Boolean keyword database	Native 384-dim semantic matching with transparent fit score
MatchOp	Early-Career & Juniors	280 TND / 690 TND/mo	Semantic vector shortlist	Cuts employer screening labor by >75% at 48h SLA

23. - 24.

Defensibility & Marketplace Liquidity

Real Moats vs. Illusory Claims

"We Use AI": *Illusion (No Moat)*. Anyone can wrap an API endpoint.

Proprietary Outcome Data: *Genuine Moat*. Tracking which student vector profiles convert to actual hires creates irreplaceable training feedback.

Campus Alliances: *Structural Moat*. Institutional integration with Junior Enterprises and student clubs creates exclusive supply-side lock-in.

Solving the Cold Start

Day 1 Supply Value: 500+ scraped external opportunities ensure candidates find value immediately upon signup.

Campus Capture: Onboarding 3,000+ students via university club CV workshops before monetizing.

Employer Conversion: Delivering the first shortlist free via white-glove concierge to prove quality, then converting to paid.

25. - 26.

Current Traction & Commercial Validation

Current Operating Metrics [VERIFIED]

Registered Candidates: 0 (Pre-launch)

Registered Companies: 3 (Active)

Job Offers Posted: 3 (Test offers)

Verified Hires: 0 (Pre-launch)

Platform Revenue: 0 TND

Early Design Partners [VERIFIED]

Solution Creative Events: Events production company seeking creative and technical crew.

Nomade Arts: Cultural space seeking arts managers and media coordinators.

Nexus: Professional training center seeking instructors and coordinators.

*Accounts created during development; represents early validation, not contracted revenue.

27. - 29.**Sequenced Roadmap & Multi-Vertical Expansion**

MatchOp's matching core is extensible into multiple opportunity verticals, but strictly sequenced to preserve focus:

**STRATEGIC GUARDRAIL ON MULTI-VERTICAL FOCUS**

Early partner engagement with *Solution Creative Events* and *Nomade Arts* proves appetite in the creative economy. However, junior tech recruitment remains the core commercial beachhead. Creative and civic matching are sequenced modules, not immediate distractions.

30. - 31.**Geographic Expansion & GTM Motion****Stage-Gated Geographic Rollout**

- **Tunisia (M1-12):** Validate liquidity, achieve 25 paying employers.
- **Morocco (M13-20):** Replicate model in Casablanca/Rabat (37.2% youth unemployment). Gated upon 35k TND MRR in Tunisia.
- **Algeria & Egypt (M21-30):** High-volume talent engine.
- **GCC Corridor (Y2+):** Export North African tech talent to Saudi Arabia & UAE for high-margin USD/SAR placement fees.

Dual-Track GTM Motion

- **B2C Candidate Acquisition:** Student tech clubs (IEEE, Enactus, JET), on-campus PFE day booths, organic career advice TikToks.
- **B2B Employer Acquisition:** Account-based LinkedIn outreach by founders targeting 100 CTOs/HR leads at ESNs.
- **Incubator Partnerships:** Exclusive junior talent pipeline for startups at The Dot, Flat6Labs, and Smart Capital.

32. - 33.

Three-Year Financial Model & Unit Economics

PRO FORMA P&L (TND) — BASE CASE	YEAR 1 (VALIDATION)	YEAR 2 (TUNISIA SCALE)	YEAR 3 (MOROCCO ROLLOUT)
Registered Candidates / MAU	4,500 / 1,800	18,000 / 7,200	45,000 / 18,000
Active Paying B2B Employers	18	65	150
B2B Shortlist Fees (280 TND/role)	11,760 TND	58,800 TND	151,200 TND
B2B Recruiter Subscriptions (690 TND/mo)	16,560 TND	79,350 TND	207,000 TND
B2C Career Micro-Tools (15–29 TND)	2,850 TND	14,400 TND	42,000 TND
TOTAL GROSS REVENUE	31,170 TND	152,550 TND	400,200 TND
Cost of Goods Sold (Hosting, APIs, Gateway)	(3,400 TND)	(14,200 TND)	(34,000 TND)
GROSS PROFIT (Margin %)	27,770 TND (89.1%)	138,350 TND (90.7%)	366,200 TND (91.5%)
Total Operating Expenses (Team, Sales, G&A)	(49,100 TND)	(124,600 TND)	(272,000 TND)
EBITDA / OPERATING RESULT	(21,330 TND)	+13,750 TND	+94,200 TND

Unit Economics per Shortlist (280 TND)

Revenue: **280 TND** • AI/API: **1.50 TND** • Payment Gateway: **6.10 TND** • Concierge QA: **22.00 TND** • **Gross Margin: 89.4% (250.40 TND).**

B2B Customer LTV & CAC Targets

Estimated CAC: **95 TND** • Annual Repeat Hires: **3.2 roles** • Retention: **3.3 years** • **LTV: 2,630 TND (27.6x LTV:CAC).**

34. - 36.

Funding Request (50k TND) & Use of Funds

MatchOp is raising an agile **50,000 TND (~\$16,200 USD)** pre-seed validation tranche **[MANAGEMENT INPUT]**. This capital moves MatchOp from code-complete to commercial traction:

BUDGET ALLOCATION CATEGORY	SHARE (%)	AMOUNT (TND)	DEDICATED MILESTONE ENABLED
Product & AI Engineering	35.0%	17,500 TND	Shortlist automation, SLA monitoring (<48h), analytics funnel
B2B Employer Sales & GTM	25.0%	12,500 TND	Outreach to 100 ESNs; securing 15–20 paying employers
Candidate Growth & Campus Clubs	15.0%	7,500 TND	Onboarding 3,000+ candidates across 5 university partnerships
Legal Incorporation & Startup Label	10.0%	5,000 TND	Registering MatchOp SAS; INPDP privacy audit; Startup Act label
Cloud Infrastructure & AI APIs	8.0%	4,000 TND	Supabase database, pgvector indexing, Groq scraper hosting
Operational Contingency Buffer	7.0%	3,500 TND	Preserving minimum 6 months runway safety buffer
TOTAL PROPOSED ALLOCATION	100.0%	50,000 TND	9 to 12 Months Operating Runway

37. - 38.

Risk Register & 90-Day Validation Plan

RISK CATEGORY	SEVERITY	MITIGATION STRATEGY	VALIDATION METRIC GATE
Marketplace Cold-Start	High	500+ scraped external jobs live from Day 1; student club distribution.	Supply ratio > 30 candidates per live opening
B2B Willingness to Pay	Fatal	Avoid rigid subscriptions upfront; sell 280 TND pay-per-shortlist.	≥8 corporate pre-commitments in Month 1
Matching Quality Falloff	High	Concierge human review of top 10 shortlists during initial 90-day pilot.	Employer shortlist review accept rate > 60%
Multi-Vertical Dilution	Fatal	Freeze volunteer and artist matching until tech recruitment is validated.	100% engineering focus on junior tech in M1-6
Disintermediation	Medium	Monetize upfront shortlist delivery, not delayed post-hire commissions.	Zero reliance on post-placement commissions

Month 1: Concierge MVP & Pre-Sales (Days 1–30)

Incorporate SAS entity; conduct founder sales to 50 ESNs; secure 10 paid shortlist LOIs; sign 5 student club MoUs.

Month 2–3: Liquidity & Hiring Proof (Days 31–90)

Onboard 3,000+ candidates; deliver 25 shortlists (<48h SLA); complete 15+ hires; convert pilot employers to 690 TND/mo.

39. - 40.

Social Impact & Core Investment Thesis

UN Sustainable Development Goals

SDG 4 (Quality Education): Actionable skill-gap feedback for students.

SDG 8 (Decent Work & Growth): Combating 26.6% graduate unemployment.

SDG 10 (Reduced Inequalities): De-biasing hiring by focusing on code repositories and projects over elite alumni pedigree.

1. The structural pain is massive (26.6% graduate unemployment vs senior brain drain).

2. The technology is already built, deployed, and functional (React 19 + pgvector).

3. 50k TND validation round minimizes dilution while proving commercial demand.

4. North Africa provides the talent engine; GCC provides the monetization scale.

41. - 42.

Investor FAQ & Conclusion

FAQ: Why won't LinkedIn or Keejob crush MatchOp?

LinkedIn monetizes corporate enterprise ads and senior profiles; its keyword search fails completely on sparse student resumes. Keejob monetizes job board ad space and has no incentive to reduce resume spam. MatchOp sells guaranteed screening time reduction: delivering 7 verified candidates instead of 300 raw PDFs.

Next Steps (30 Days Post-Funding)

- 1. Execute legal registration of MatchOp SAS in Mahdia.
- 2. Apply for Tunisian Startup Act Label (Smart Capital).
- 3. Open corporate bank account and setup financial reporting.
- 4. Launch 90-day pilot across 5 partner universities.

Direct Investment Contact: MatchOp Leadership Team • matchop@gmail.com • fatnassizied@fsegma.u-monastir.tn • Mahdia, Tunisia
